

PARTICIPANTS NEEDED!

**For research in the effect of play-based intervention
on social communication skills in autistic children**

**We are looking for
caregivers of children
with ASD who are:**

- aged 3-7.
- interested in playing with
LEGO or similar building
blocks

**If you agree to
participate, you would
be asked to:**

- video-record multiple regular
family activities
- attend a virtual training session
- implement the structured LEGO
play intervention with your child
at home for at least
10 sessions.

Please note that the
entirety of this study will
be virtual and you would
self-select the timing of
every session.

In appreciation of your
time, you will receive up
to \$100 in Amazon gift
cards.
